## **ELECTION OF SPECIES**

### ***Response to Amendment***

1. The amendment and drawing corrections received on January 21, 2003 have been entered. Pages 1-36 of the substitute specification now replace pages 1-33 of the original specification, which will be retained in the file. Applicant's provision of a marked-up copy of the substitute specification and assertion that no new matter has been entered (i.e., on page 10 of the response) is acknowledged. The drawing corrections are acceptable. A complete new set of drawings that address the draftsman's objections and the changes proposed by applicant is now required to avoid abandonment of the application. The correction to the drawings will not be held in abeyance. Claims 14-32 are now pending, and subject to the election requirement below.

### ***Election/Restrictions***

2. This application contains claims directed to the following patentably distinct species of the claimed invention:

- Species I, depicted in figures 2-4, is described as capturing a distance image by modulating light source intensity while holding an image capture gain constant (Claims 14, 15 and 18-23 are directed to this species).

- Species II, depicted in figures 5-7, is described as capturing a distance image by modulating image capture gain while holding light source intensity constant (Claims 16, 17 and 24-29 are directed to this species).

3. Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claims 30-32 are generic to each of the above species. Should applicant elect species I, claims 14, 15, 18-23 and 30-32 will be examined. Should applicant elect species II, claims 16, 17, 24-29 and 30-32 will be examined.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record

Art Unit: 2621

showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

4. A telephone call was made to Chidambaram Subramanian (Reg. 43, 355) on March 28, 2003 to request an oral election to the above restriction requirement, but did not result in an election being made. The application had to be acted upon by the examiner before applicant's representative could respond. The examiner regrets any inconvenience.

5. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

6. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Brian P. Werner whose telephone number is 703-306-3037. The examiner can normally be reached on M-F, 8:00 - 4:30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Leo H. Boudreau can be reached on 703-305-4706. The fax phone numbers for the organization where this application or proceeding is assigned are 703-872-9314 for regular communications and 703-872-9314 for After Final communications.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is 703-305-4750.
